Notes:

Alco prime-mover (1,600 hp) replaced with EMD 567 engine (1,125 hp). Long hood height extended to fit new engine on some PC #73600, an old F7B frame and shell with a hole in its roof, was used to transport E-unit 567 engines from Juniata to Dewitt and Wilmington

All PC rebuilds to CR as the same number

CR road numbers in parenthesis were the road numbers assigned to the units in the initial CR renumbering plan. Neither CR lettering nor these road numbers were applied to the unit.
